

HP Easy Printer Care Software

Version 2.2

Now compatible with Windows Vista™!

HP Easy Printer Care Software helps you easily maintain up to 15 HP LaserJet printers to keep them running at their best.

Effortless printer and MFP upkeep

- **Save time and accomplish more.** HP Easy Printer Care Software 2.2 is your one-stop management solution for up to 15 HP LaserJet printers and MFPs.¹ Perform multiple tasks with one tool: easily view the status of one or multiple devices, set up printer and supply alerts to your liking, generate basic usage reports, and reorder supplies from HP or a choice of resellers with the click of a button. Get the information you need and take action in fewer steps.
- **Experience instant, personalized support.** To help you quickly resolve printing issues, HP Proactive Support, included with HP Easy Printer Care, offers Web-based support services that identify, diagnose, and resolve problems. Once enabled, the software runs in the background and intelligently detects and provides solutions for known issues. HP Proactive Support also notifies you of software updates such as new drivers or printer firmware.
- **Enjoy easy access and wide compatibility.** You don't have to jump through a lot of hoops to get HP Easy Printer Care Software 2.2. Download it free from a link found on the install CD provided with HP's newer printers and MFPs or download it at www.hp.com/go/easyprintercare. The software is compatible with most HP LaserJet printers and MFPs.
- **Discover HP devices in your Printers folder automatically.** The software automatically manages supported HP devices in your **Printers** folder, so you can start monitoring devices right away. You can also search your network for additional HP devices.

Protect your color investment

- **Control expenses and rein in printer usage.**² Monitor how your devices are being used with reports that track printing by user, device, application, and time of printing. With this valuable information, you can easily detect misuse and take the appropriate action, keeping printing expenses down.
- **Take the guesswork out of printer usage.** Understand just how often and in what capacity your devices are used. It's the perfect tool to control costs and determine your company's specific printing needs.

Simple supplies replenishment

- **View the status of all your HP LaserJet printers and MFPs.** The intuitive graphical interface clearly indicates items that require your attention for each printer. It provides simple support links as well as supplies information and status via charts, including the estimated number of pages remaining for each cartridge. Consolidated alerts provide support and supplies status for multiple printers in a single view.
- **Manage supplies easily with HP SureSupply.**³ HP supplies and your HP devices exchange information to provide a snapshot of supplies status for all of your HP devices. Any supplies that are needed are then consolidated into a single order that includes part numbers. Simply choose a link to your preferred reseller and place your order online using HP SureSupply.
