

Capella MegaTrack Job Accounting

Control and audit your printing and imaging costs

Implement a complete tracking solution for all printing and imaging workflows to reduce your operating costs, increase accountability, and free up IT resources.

Proactive print management

- **Make timely, informed management decisions.** As part of HP's full line of network management tools, MegaTrack Job Accounting tracks network and walk-up printing and imaging activity so you can plan budgets, balance loads, calculate costs, and prevent unauthorized use, without degrading network performance.
- **Identify problems and forecast purchases.** Create reports by division, project, server, printer, user, location, and organization level. You can count on accurate, up-to-date data that can also be used to generate derived and assigned costs for the different device types in your environment.
- **Automatically receive e-mail reports.** Schedule report generation and have reports e-mailed to you, or remotely access them from any PC using a standard Web browser. With the relevant information at your fingertips, you can make knowledgeable management decisions.

More operational efficiency

- **Free up IT resources.** The software automatically adds new users and devices to your job accounting database, so you have more time to focus on high-level management and business-critical tasks.
- **Prevent unauthorized use.** Set monthly print limits based on different device types. Restrict usage to a certain number of pages per month, limiting device abuse in the office space and ensuring that budgets are maintained.

- **Get detailed information, even for high print volumes.** In addition to the numerous tracking parameters available, this sophisticated software solution is designed to handle millions of pages per month for large enterprise-sized companies.
- **Experience ease of deployment with server-based software.** No client software is required.¹ Load once onto your server, and the software will automatically configure the different devices and users for you.

Allocate printing costs

- **Capture MFP walk-up activity.** The optional SecureJet MFP Authentication DIMM² authenticates users, controls access to features, and tracks all walk-up multifunction use—integrating with the network print activity data to provide a comprehensive device use profile.
- **Accurately allocate costs to users and groups.** This robust software confirms all data gathered at the print spooler by querying the printer to ensure job completion. Benefit from comprehensive analyses, even in a multi-vendor environment, and feel confident that you can make timely, well-informed decisions based on reliable, precise data.
- **Export data to other billing systems.** You can export data gathered by MegaTrack Job Accounting in .csv or .xls format. The exported files are compatible with most database and billing systems, providing amazing flexibility and versatility. Get or deliver information in the format that best fits your business needs.

¹ This assumes that all printing is through Windows® print spoolers. If you are performing direct IP printing, using a non-Windows spooler, or using a non-networked device, client software is needed.

² Not included, sold separately.

Capella MegaTrack Job Accounting

Control and audit your printing and imaging costs

Technical specifications

Modules	MegaTrack consists of three fundamental modules, described below: <ul style="list-style-type: none"> • The MegaTrack Print Server (MPS) tracks all printed jobs and sends this information to the database. It must always be installed on a Windows print server. • The MegaTrack Database Server (MDS) manages the database where the information collected by the MPS is stored. • The MegaTrack Web Server (MWS) manages the MegaTrack Web site, which is used as interface by the application.
MPS minimum requirements	
Hardware	Intel® Pentium® II 400 MHz processor, 256 MB RAM, 500 MB free disk space (The necessary disk space depends on the number of documents printed in your print system per day. You should keep at least double your free spooler disk space size.)
Software	Windows NT® 4.0 Workstation SP4, Windows NT 4.0 Server SP4, Windows 2000, or Windows XP® Internet Explorer 4.02 SP2 minimum
MDS minimum requirements	
Hardware	Intel Pentium III 800 MHz processor, 512 MB RAM, 1 GB free disk space (more depending on backups), fixed IP address
Software	Under NT 4.0 Server Workstation: <ul style="list-style-type: none"> • SP4 (SP6 recommended) • MSDE³/SQL7/2000 Enterprise (Desktop with NT 4.0 workstation) Under Windows 2000 Pro/Server: <ul style="list-style-type: none"> • MSDE³/SQL7/2000 desktop (Enterprise under 2000 server)
MWS minimum requirements	
Hardware	Intel Pentium III 800 MHz processor, 512 MB RAM, 1 GB free disk space (more depending on number of queries launched and number of jobs stored into the database)
Web user minimum requirements	
Hardware	No specific requirements
Software	Internet Explorer 4.0 SP2 recommended
Client Allocation users requirements	
Hardware	Intel Pentium II 400 MHz processor, 128 MB RAM, 200 MB free disk space
Software	Windows NT SP4, Windows XP, Windows 2000, or Windows 95/98/Me
Printers minimum requirements	
Hardware	MegaTrack supports any printer brands and models setup on the Windows print servers. However the information detected by MegaTrack may vary.
Drivers	PCL 3 to PCL 5e, PCL XL/6, PostScript® Level 3 MegaTrack is generally compatible with all print jobs, which are encapsulated in PCL, whatever the driver and port monitor used. (All print jobs containing HPGL2 data are encapsulated in PCL.)
Port monitors	All standard TCP/IP and LPR monitors.
Connection	Printers must be connected to a Windows network (on Ethernet 10/100 Base-T) and be configured with a fixed IP address.
Declaration	Printers can be declared either locally, through the network, or as a redirected printer (through another Windows print server).
Sharing	All printers declared on the print server must be shared. ⁴

³ MSDE is the free version of SQL database engine.

⁴ Caution: the hardware configuration should be adapted according to your configuration and take into account the restrictions imposed by MegaTrack. These restrictions are listed in the MegaTrack Installation Guide.

Ordering information

Capella MegaTrack product	Description	Part number
Software and support		
Enterprise Job Accounting	Includes unlimited number of users and printers, tracking of 2 print servers, tracking of 100 PC stations (MPC modules), quota and allocation modules, remote installation support, and one year of phone support and software maintenance.	CPL101BN
Standard Job Accounting	Includes up to 500 users, up to 40 printers, tracking of 1 print server, tracking of 20 PC stations (MPC modules), quota and allocation modules, remote installation support, and one year of phone support and software maintenance.	CPL201BN
Standard User/Printer Pack	Adds 20 printers and 100 users for up to a maximum of 100 printers to Standard Job Accounting software.	CPL211BN
Small Business Job Accounting	Includes up to 100 users, up to 20 printers, tracking of 1 print server, tracking of 5 PC stations (MPC modules), remote installation support, and one year of phone support and software maintenance.	CPL301BN
Allocation Module Bundle	Lets IT display a pop-up window at the client to add tracking information to the job each time you print. Includes remote installation support and one year of phone support and software maintenance.	CPL311BN
Quota Module Bundle	Lets IT assign a quota to control the number of pages printed per user and per printer. Includes remote installation support and one year of phone support and software maintenance.	CPL312BN
Expansion components		
Additional Print Spooler Bundle	Additional license for MegaTrack Standard or MegaTrack Enterprise Job Accounting software. Includes remote installation support and one year of phone support and software maintenance.	CPL601BN
Additional Client Bundle	License to add tracking for 100 more clients on MegaTrack Standard or MegaTrack Enterprise Job Accounting software. Includes remote installation support and one year of phone support and software maintenance.	CPL602BN
SecureJet components		
SecureJet FP MFP Authentication DIMM	Provides authentication for all activity on MFPs, including network printing, copying, faxing, scanning, e-mail, and more, depending on MFP model. Currently available for the HP LaserJet 9000mfp and 4100mfp. Includes one year of phone support and software maintenance.	CPL990BN CPL941BN
