

HP Web Jetadmin Report Generation Plug-in 3.1

Get more reports than ever: learn everything you can about your printing and imaging environment—then improve it.

New features

- **More reports**—New inventory, printed pages (one and two-sided) by user information, and a consolidated supplies report that makes it easier to reorder supplies through your existing procurement process offer even more control.
- **Consolidated, assisted supplies reordering**—Predictive supplies management provides a pre-populated list of supplies needed for approval and routing to your preferred vendor.

Balance printer deployment

- **Understand and control costs with more reports.** More helpful reports than ever before—including real-time inventory, printed pages (both one and two-sided) by user, and supplies usage reports—help you identify areas where you could achieve even better utilization of your assets.
- **Get the information you need.** Detailed usage tracking ensures that you have the right feature availability, right usage levels, and right device placement in a balanced deployment that matches your business.
- **Create customized trending reports and graphs.** Export data to other databases and import data into custom fields within the report generation database.
- **Track how devices are used.** Now you can know which devices are being used, who is using them, and the type of output being printed. For a detailed understanding of fleet activity, trace device usage by user, job, application, media, and even color and black-and-white printing.
- **Track device assets.** Take advantage of detailed device and accessory asset tracking to highlight changes in the printing environment.
- **Track error logs.** Trace history and trends in error reports to predict and resolve problems before they occur.
- **Get quick reports.** The plug-in offers a wide range of preformatted reports and graphs for fast access to the critical data you need.
- **Minimize network impact.** Schedule data collection at off-peak hours to minimize network impact and keep your business running smoothly, while receiving all the information you need.

Reduce waste and expense

- **Receive e-mail reports automatically.** Schedule automatic e-mails of trend analysis reports across any designated time period—from a single day to when you first began collecting data. This can help locate frivolous color printing to decrease supplies expense.
- **Experience the same look and feel as HP Web Jetadmin.** The plug-in fits seamlessly into your HP Web Jetadmin peripheral management environment, capitalizing on such features as discovery, device grouping, and the simple user-interface with which your staff is already familiar.
- **Streamline the budget process.** The wide combination of reports gives you all the information you need to plan and budget for your imaging and printing environment.

Improve supplies management

- **Take control of your supplies.** Improved toner-level alerts, threshold levels, and supplies reporting capabilities allow you to customize how proactive your business needs to be in order to facilitate supplies forecasting and reordering.
- **Track and forecast supplies usage.** The plug-in works with HP Smart printing supplies¹ to keep track of supplies information—such as print cartridge levels—which allows you to forecast supplies purchases and streamline device management and the budgeting process.
- **Simplify supplies management.** Always have the printing supplies you need—right when you need them. Automatically receive periodic reports on tracked devices that detail which supplies are needed and in what quantities. The plug-in not only allows you to easily shop for and reorder supplies through HP SureSupply, it also provides a new consolidated supplies report that makes it easier to reorder supplies through your existing procurement process.

¹ Using genuine HP supplies ensures availability of all HP printing features.

Simplify peripheral management and save time with automated reports

Knowing everything that's going on in your printing and imaging environment gives you the power to improve it—you can increase device uptime, reduce color abuse, re-allocate devices to better meet the needs of various departments, improve end-user productivity, and even reduce your total cost of ownership.

The HP Web Jetadmin Report Generation Plug-in offers powerful insight into your print environment by providing a variety of reports tracking everything from who uses color and how often they use it, to which machines are used most heavily, which tend to sit idle, and which have the highest uptime. It can e-mail reports listing the highest volume color users and predict when supplies will need to be replaced, so you can order supplies before running out.

If you're looking to get more from your printing and imaging environment, install the free HP Web Jetadmin Report Generation Plug-in 3.1 today using HP Web Jetadmin's product update feature!

With the HP Web Jetadmin Report Generation Plug-in, you can:

- Track device usage by user.
- Generate reports on page details, including number of pages printed, scanned, or copied, with information on color or black-and-white usage, single- or double-sided documents, and document sizes.
- Follow error log histories and trends.
- Track consumables use and potential misuse.
- Track and report by single device or device group.
- Discover and track all printing assets.
- Compare two reports and generate a list detailing devices added to or removed from your supported peripheral population.

Technical specifications	HP Web Jetadmin Report Generation Plug-in
Supported network operating systems	Microsoft® Windows® Server 2000 Professional, Server and Advanced Server (with service pack 4), XP Professional (with service pack 2), Server 2003
Supported browsers	Microsoft Internet Explorer 6.0, 7.0
Supported peripherals	HP Web Jetadmin supports HP and non-HP printers connected through HP Jetdirect print servers and standard printer MIB-compliant third-party network connected printers. The capabilities available for third-party printers will vary from basic to more robust capabilities when the devices are used with HP-certified Web Jetadmin plug-ins.
Supported network protocols	TCP/IP
System requirements	HP Web Jetadmin 8.1, PC with 2.4 GHz processor, 512 MB RAM, 1 GB available disk space for database growth

HP printing and imaging systems help you create powerful, professional communications easily. HP printers, supplies, accessories, and services are designed to work together and are invented to meet your business needs.
