

HP-UX 11i Knowledge-on-Demand:

performance optimization best-practices from our labs to you

Developer series

Introduction to HP-UX 11i Knowledge-on-Demand Webcasts

Welcome to the HP-UX 11i version 3 Knowledge-on-Demand HP technical Webcast series, Performance optimization for developers.

[NEXT SLIDE]

The HP-UX 11i version 3 Knowledge-on-Demand HP technical Webcast series was developed to provide our software development partners and customers who write applications for HP-UX 11i, the tools they need to achieve better business outcomes.

To do this, we're delivering a series of technical, on demand training Webcasts focused on helping developers increase performance through application optimization for HP-UX 11i version 3 on HP Integrity servers.

Following this, or any of the other training Webcasts, you'll be able to contact HP with any follow up questions.

You can view the entire list of available training modules for the Performance optimization for developers series as well as the Performance optimization for deployment personnel series at our website at "hp.com" forward slash "go" forward slash "knowledgeondemand".
